

Cleveland Mobile FAB LAB

LIGHT UP- PUSH OUT CARDS

CIRCUITS AND ELECTRICITY

STEM LEARNING

PHYSICS, ART, and PROBLEM SOLVING!

This long workshop can be adapted for grades k-12 as a 1 hour, 1 day or 1 week long workshop. Students will learn about simple circuits and electricity before using problem solving and fine motor skills to construct their own push-out card! Next they will use copper tape and LEDs to make their card light up!

Perfect for a Holiday activity or paired with an electricity unit in science class!
